

Kessick Wine Cellars

Designers and Manufacturers of High Quality Wine Cellar Racking

Collecting and consuming wine has never been more popular. A wine cellar is a natural way to store wine while adding to the entertainment value of your home. Kessick can provide the wine racks that will make your wine cellar dream a reality. Our comprehensive catalog of Sapele mahogany wine cellar racks and components will fit just about any size, shape or style of wine room you can imagine, at a price you will love.

Kessick Wine Cellars racks are fully assembled wine rack components that are installed much easier than 'assemble-on-site' kits with a far superior fit and finish. Base (bottom) and wall (top) components allow for seemingly endless design possibilities from utilitarian to showpiece.

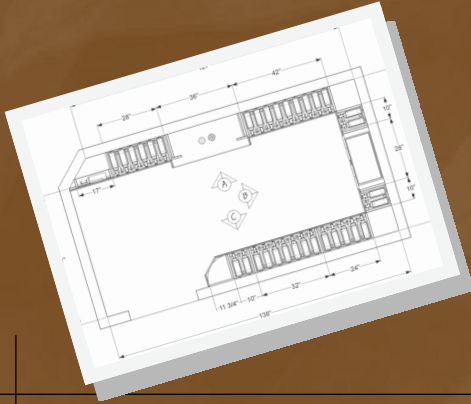

Sapele mahogany is a rich colored, dense wood that has a natural moisture and mold resistance making it ideal in a wine cellar environment. Our wine racks are available finished or unfinished. We are happy to provide you with a wood sample for color comparisons. Custom wood species, stain and finishes available upon request.
