

Kessick Wine Cellars

~ Out Of The Cellar ~

October 2010

We are updating our websites and combining our local website, Kessick.com & our dealer website, KessickWineCellars.com. This should help alleviate the confusion many of you have had. If you have any ideas or suggestions that you feel we should implement to make our website more user friendly for you, please don't hesitate to share them!

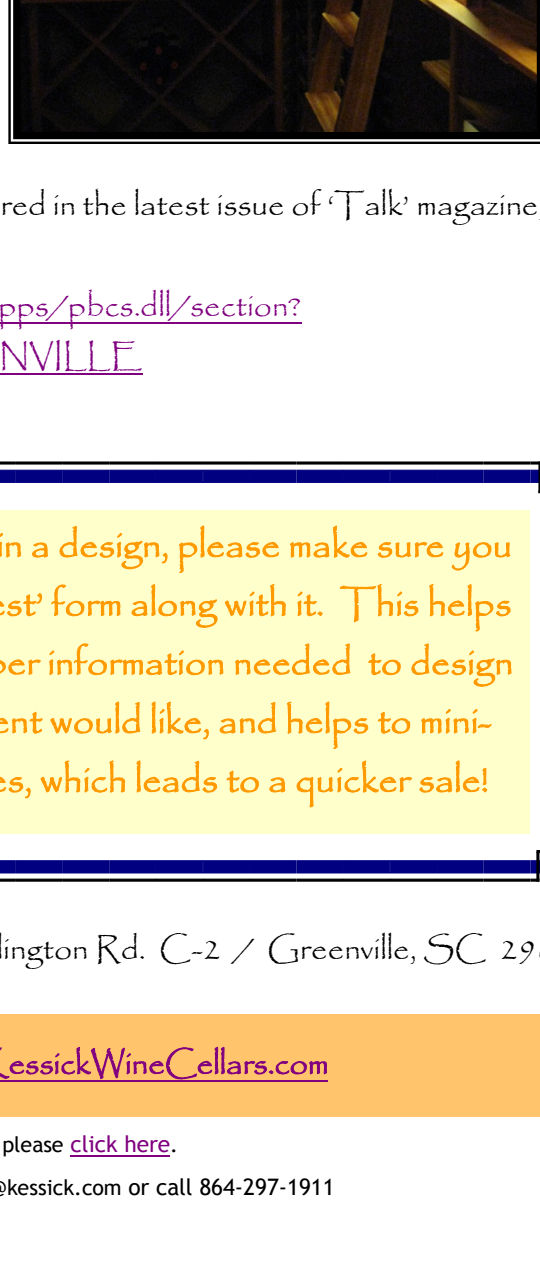

Feature Of The Month ~

Fosters Wine Cellar, Greenville, SC

Greenville, SC ~ To maximize bottle capacity in this small climate controlled cellar, we brought the 10' ceiling down to 9', extended the wine racks to the ceiling and added a library ladder with rail to reach the additional wine racks on top. The arch niche was extended as well to make it more proportionately correct.

Dealers, send us your wine cellar photo's, we would like to showcase them for everyone to see!!

Kessick wine cellars is featured in the latest issue of 'Talk' magazine, check it out!

Tip ~ When sending in a design, please make sure you send in a 'design request' form along with it. This helps you to collect the proper information needed to design the wine cellar your client would like, and helps to minimize the design changes, which leads to a quicker sale!

Kessick, LLC / 319 Garlington Rd. C-2 / Greenville, SC 29615
